6.2.3 - Implementation of e-governance in areas of operation:

1. Administration
2. Finance and Accounts
3. Student Admission and Support
4. Examination

Enterprise Resource Planning (ERP) is a web application that can be managed by the administrative staff and accessible by instructors and students with a valid username and password. It unifies all the modules and operations of a college system into one system. A college ERP system is an integrated software solution designed to manage various administrative and academic functions of higher education institutions. This system typically includes modules for admissions, student information management, financial aid, billing and payments, academic records, faculty and staff management, and more.

The enterprise resource planning system at the college has now converted the handwritten data to digital form. Once the information is placed into the computer or system, different people do not need to handle various pieces. To keep track of all the reports and records, just one person is needed. In addition, user requirements can provide security.

Registered Under Section 2(F) & 12(B) of UGC Act
